The background of the entire page is a close-up, shallow depth-of-field photograph of numerous blue, oval-shaped capsules. The capsules are scattered across the frame, with some in sharp focus in the foreground and others blurred in the background. The lighting is bright, creating highlights on the smooth surfaces of the capsules.

AN ANALYSIS OF NORTHEASTERN PENNSYLVANIA AS A  
**DISTRIBUTION & MANUFACTURING LOCATION FOR  
COMPANIES SERVING THE HEALTHCARE INDUSTRY**

**HEALTHCARE** WHITE PAPER

# INTRODUCTION

Northeastern Pennsylvania (NEPA), consisting of Northern I-81 Corridor communities such as Scranton, Pittston, Wilkes-Barre, and Hazleton, continues to be a leading location for manufacturing and distribution companies that serve the healthcare industry.

Overall, healthcare is big business in NEPA. More people are employed in the healthcare sector in NEPA than in any other sector.

SECTOR	PERSONS EMPLOYED
Healthcare & social assistance	44,142
Retail trade	31,210
Manufacturing	25,064
Accommodation & food services	20,110
Educational services	19,955
Transportation & warehousing	18,317
Admin, support, waste mgmt, remediation	16,741
Wholesale trade	10,139
Finance & insurance	9,760
Public administration	9,009
Construction	8,827
Professional, scientific, & technical svc.	7,653
Other services (except public admin.)	6,745
Information	4,593
Management of companies & enterprises	2,950
Arts, entertainment, & recreation	2,607
Utilities	2,316
Real estate rental & leasing	1,575
Mining	536
Forestry, fishing, & related activities	161

## NEPA INDUSTRIAL EMPLOYERS WITH TIES TO THE HEALTHCARE SECTOR

- Apria Healthcare
- Aramark
- Arjo Huntleigh
- Balester Optical
- Benco Dental
- Cintas
- Corning Life Sciences
- CVS Caremark
- GE Healthcare
- Golden Technologies
- Henry Schein
- Hospital Central Services (HCSC)
- Johnson & Johnson
- KCI
- Luzerne Optical Laboratories
- Musculoskeletal Transplant Foundation
- NBTY, Inc.
- Noble Biomaterials, Inc.
- Patterson Dental Supply, Inc.
- PharMerica
- Pride Mobility Products
- Sanofi Pasteur
- SCHOTT North America
- Unifirst Corporation
- Young's Medical Equipment

NEPA's combination of immediate interstate access, close proximity to major cities, new speculative industrial development, affordable operating costs, incentive financing programs, and a great workforce backed by an exceptional higher education network continues to grow healthcare-related industries in the region.

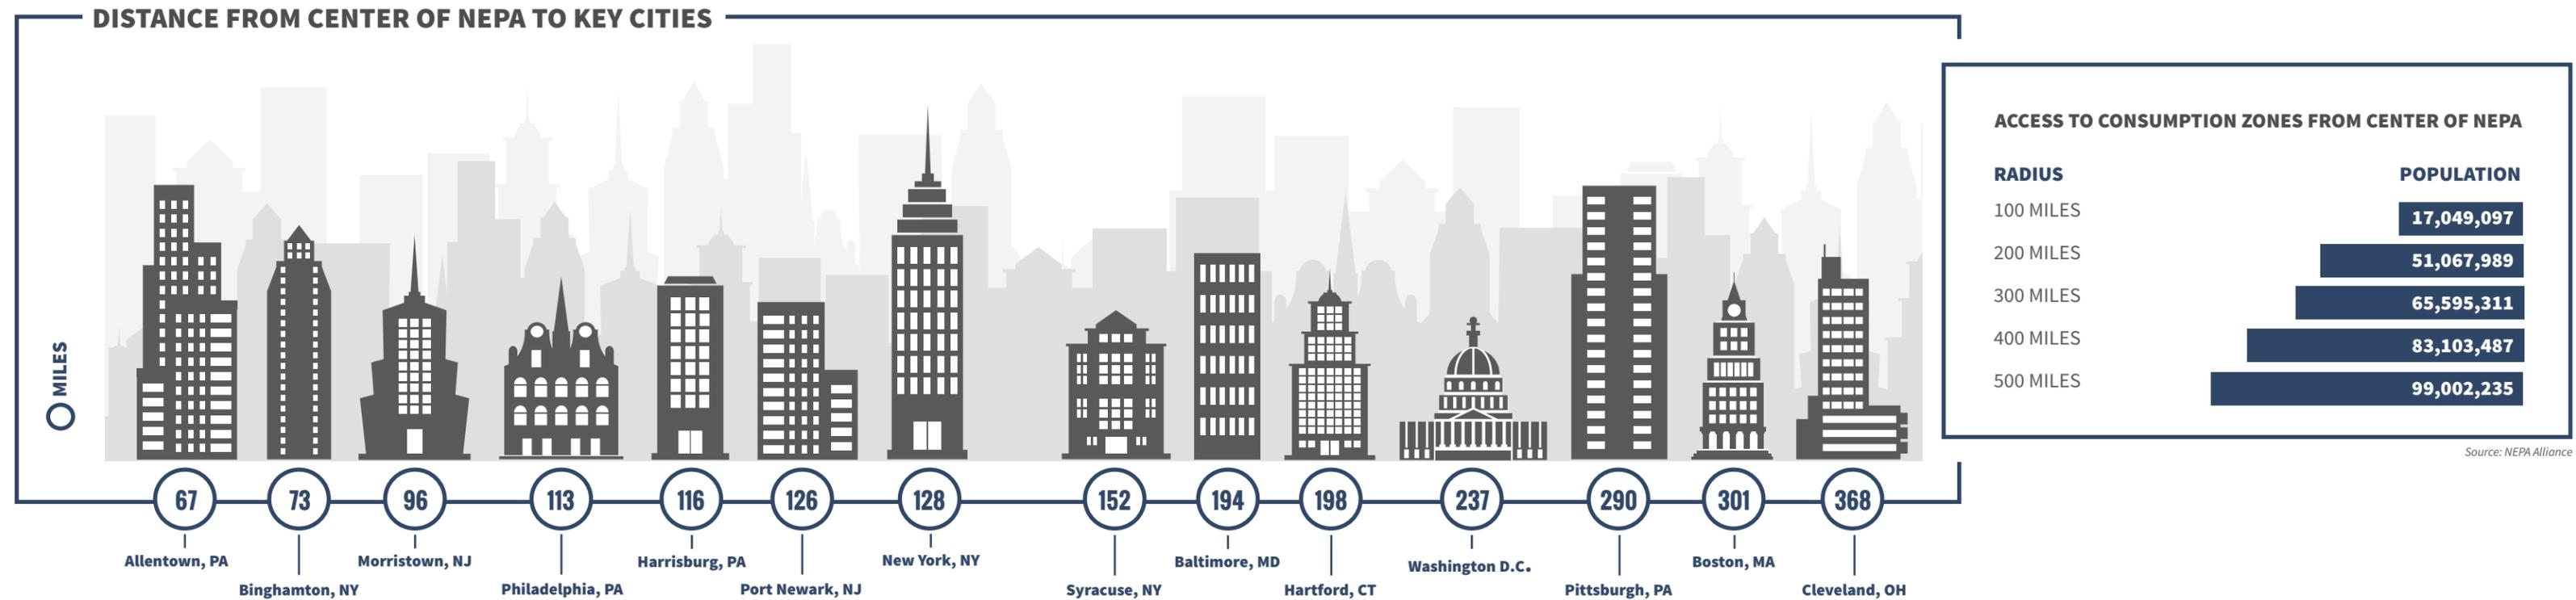

# LOCATION & ACCESS

The region is in the center of the Boston/Washington Corridor and is at the confluence of five major highways. Interstates **80, 81, 84, 380, and 476** meet in NEPA and provide excellent access to firms wishing to serve Maine to Virginia and west to Ohio. I-78 can be reached in less than one hour. There are no major bridges or tunnels in the region to delay truck departures or arrivals. I-80, I-81, I-84, and I-380 are toll-free here.

More than 99 million people, about one third of the nation's population, live within a 500 mile radius of NEPA, and more than 51 million people live within 200 miles. New York City, Philadelphia, Harrisburg, and Syracuse can all be reached in about two hours.

The region's main highway, I-81, runs from the US/Canadian border in the North to Knoxville, Tennessee in the South. I-81 intersects several major East-West highways, which include I-80 (access to New York City), I-78 (access to the Lehigh Valley and New Jersey), I-84/I-90 (access to Boston), I-76 (access to Pittsburgh and Philadelphia), I-70/I-270 (access to Washington DC), and I-83 (access to Baltimore).

NEPA is quickly accessible to most major seaports along the East Coast, which are predicted to experience increased volume once infrastructure upgrades to the Panama Canal are complete. Upgrades to the Canal will allow for the passage of "post-Panamax" ships with a capacity to carry 14,000 containers (three times more than a ship can currently carry through the Canal).

## TRANSPORTATION SERVICES

Dozens of truckload and less than truckload trucking firms serve the region. Some companies active here include ABF Freight, A. Duie Pyle, Bolus Freight Systems, Calex Logistics, Con-Way Freight, Evans Distribution Systems, Estes Express Lines, Kane is Able, Karchner Logistics, M.S. Carriers, NFI Logistics, New Penn Motor Express, Pitt Ohio Express, PRIME, Inc., R.C. Moore, R & L Carriers, RLS Logistics, Ward Trucking, and YRC National. UPS, FedEx Ground, and FedEx Express have major facilities in NEPA. FedEx Ground is expanding via the construction of a 310,000 square foot distribution center in Pittston Township, near I-81.

Two Class I railroads (Norfolk Southern and Canadian Pacific) and several short lines serve the area. An inter-modal rail yard is operated in Taylor, near Scranton.

NEPA is served by two main airports, the Wilkes-Barre/Scranton International Airport (AVP) and the Lehigh Valley Airport (ABE).

The Wilkes-Barre/Scranton International Airport ([www.flyavp.com](http://www.flyavp.com)) offers approximately 40 daily arrivals and departures to eight major hubs with one-stop service to more than 450 worldwide destinations. AVP provides direct daily flights to Atlanta, Charlotte, Chicago, Detroit, Newark, Orlando, Philadelphia, and Tampa. Carriers include Allegiant, Delta Connection, United Express, and US Airways Express. AVP is also served by Saker Aviation, one of the finest fixed base operators in the Northeastern United States.

The Lehigh Valley International Airport ([www.lvia.org](http://www.lvia.org)) provides direct daily flights to Atlanta, Charlotte, Chicago, Newark, Detroit, the District of Columbia, Orlando, Philadelphia, St. Petersburg, and Toronto.

## NATIONAL RANKINGS FOR LOGISTICS

Esteemed national site consultant Christopher Steele of Investment Consulting Associates near Boston has listed Eastern PA, including NEPA, as the 7th top logistics location in the United States.

Labor market research firm Economic Modeling Specialists International, [economicmodeling.com](http://economicmodeling.com), listed the Scranton/Wilkes-Barre area 5th in the US for total employment growth in the warehousing and storage sector from 2010 through 2013. Scranton/Wilkes-Barre, with 8,869 total

total transportation and warehousing jobs and a growth rate of 21%, finished behind only Riverside/San Bernardino/Ontario, California; Columbus, Ohio; Indianapolis-Carmel, Indiana; and Memphis, Tennessee.

Of the approximately 74 million square feet of bulk industrial space in NEPA, more than 33 million square feet is occupied as distribution space. About 16 million square feet of bulk industrial space has been built and occupied in NEPA since just 2007.

**THE FIVE INTERSTATE HIGHWAYS THAT CONNECT IN NORTHEASTERN PENNSYLVANIA MAKE IT VERY EASY FOR US TO DISTRIBUTE OUR PRODUCTS TO MORE THAN ONE THIRD OF NORTH AMERICA'S POPULATION OVERNIGHT.**

## EMPLOYERS CITE STRATEGIC LOCATION

NEPA's employers often cite the area's strategic location as a factor in their success in the area.

*"The five interstate highways that connect in Northeastern Pennsylvania make it very easy for us to distribute our products to more than one third of North America's population overnight. This area's great access, combined with a dedicated and highly productive workforce, has helped Benco Dental become the nation's largest independent dental distributor."*

**RICK COHEN, MANAGING DIRECTOR  
BENCO DENTAL**

*"The key reasons for our success in distribution in Northeastern Pennsylvania are:*

- We are located within five hours of all major cities in the Mid-Atlantic and New England areas
- Low overhead
- Low taxes
- An inspired workforce with a great work ethic
- A hometown flavor
- And more..."

**RAY LICK, WILKES-BARRE REGIONAL MANAGER (RET.)  
HENRY SCHEIN, INC.**

*"Northeastern Pennsylvania is an ideal place for a distribution facility. Lower operating costs, fast shipping to the largest population centers, and access to a large, motivated workforce are just a few of the factors that made us decide to locate our largest distribution facility in Northeastern Pennsylvania."*

**JOE ELLMAN, DIRECTOR OF OPERATIONS  
DISCOUNT DANCE SUPPLY**

*"Our Men's Wearhouse Pittston distribution center fulfills the tuxedo needs of all MW stores located in the northeast sector of the country. Located just hours from all of our major markets, we have the capability of efficiently servicing our stores on a daily basis. Our current location also provides accessibility to an ample workforce experienced in distribution and at competitive wages. Along with a strong sense of community, these are just some of the advantages of operating in Northeastern Pennsylvania."*

**TOM GAYNORD, GENERAL MANAGER  
MEN'S WEARHOUSE**

*"With its excellent geographical location, areas of Northeastern Pennsylvania are easily accessible from New York City, Philadelphia, and New Jersey, with major interstate highways, international and regional airports, and ports providing a strong and efficient intermodal network."*

**MARK PISANO, OPERATIONS MANAGER  
JP BODEN SERVICES INC.**

*"Northeast Pennsylvania was a great location for establishing our electric utility warehouse distribution center. The interstate highway system allows us to efficiently receive and ship product to our customers. In addition, the available workforce allowed us to start up a green field distribution operation in a short time frame."*

**DAN MORRISON, GENERAL MANAGER  
HD SUPPLY**

## LABOR AVAILABILITY

Despite its strong industrial growth since 2000, NEPA's unemployment rate continues to run higher than state and national averages. In fact, according to the Pennsylvania Department of Labor & Industry (PA L&I), NEPA's unemployment rate is the third highest of any metro area in Pennsylvania.

The following statistics, released by PA L&I, demonstrate how the region has compared to the state and nation in recent years. **These are seasonally adjusted rates that have been rounded.**

YEAR	NEPA CIV. LABOR FORCE	EMP.	UNEMP.	NEPA RATE %	PA RATE %	US RATE %
2015	270,100	254,000	16,000	5.8%	5.3%	5.5%
2014	260,900	242,300	18,700	7.2%	5.6%	6.3%
2013	270,800	245,300	25,600	9.5%	7.9%	7.6%
2012	270,300	244,800	25,500	9.4%	7.6%	8.2%
2011	264,600	239,800	24,700	9.3%	7.9%	8.9%

Source: [www.paworkstats.state.pa.us](http://www.paworkstats.state.pa.us)

Local employers report that most non-skilled workers will commute up to 20 miles to work, while skilled workers will commute more than 30 miles. Local commutes are enhanced by an excellent interstate and local road network. For example, a 20 mile commute can typically be made in less than 30 minutes. According to the U.S. Census Bureau, average daily commutes to work range from 20 to 25 minutes throughout NEPA.

Recent unemployment information for 20, 30, and 40 miles from the center of NEPA:

**20 MILES FROM CENTER OF NEPA**  
TOTAL POPULATION = **470,890**

YEAR	CIV. LABOR FORCE	EMPLOYED	UNEMPLOYED
2015	233,389	221,294	11,962

**30 MILES FROM CENTER OF NEPA**  
TOTAL POPULATION = **686,573**

YEAR	CIV. LABOR FORCE	EMPLOYED	UNEMPLOYED
2015	335,759	316,285	19,246

**40 MILES FROM CENTER OF NEPA**  
TOTAL POPULATION = **955,568**

YEAR	CIV. LABOR FORCE	EMPLOYED	UNEMPLOYED
2015	470,092	441,374	28,400

Labor availability for companies needing seasonal help is enhanced by the fact that there are close to 55,000 college students in the immediate NEPA area, many of whom often seek part-time employment.

### LABOR MANAGEMENT

The rate of unionization of private employers in NEPA has been steadily declining since the 1980s. In 1986, 18.4% of the private workforce in NEPA was unionized. By 2012, the percentage had dropped to 9.9%. Of the more than 200 major new private employers that have moved to the region since 1996, less than 10 are believed to have become unionized.

### LABOR COST

In addition to being readily available, NEPA's labor force is also cost competitive compared to other metro areas in Pennsylvania.

Within Pennsylvania, NEPA often competes for new corporate locations against the Lehigh Valley (Allentown/Bethlehem/Easton/Reading), South Central PA (Harrisburg/Carlisle/York/Lancaster), and Southeast PA (Philadelphia and its suburbs). The following page lists 2014 wage data compiled by the Pennsylvania Department of Labor & Industry.

MANUFACTURING BREAKDOWN

NEPA has a long history as one of the leading manufacturing regions in the Northeast US. According to the United States Census, in 2012 there were 580 manufacturing establishments in the Scranton/ Wilkes-Barre/ Hazleton MSA. **The largest manufacturing subsectors ranked by total employment were as follows:**

Food	4,165
Fabricated metal products	3,971
Plastics & rubber products	3,448
<b>Medical equipment &amp; supplies</b>	<b>2,520</b>
Printing & related activities	2,002
Converted paper products	1,192

## LABOR QUALITY

NEPA is nationally known for its highly productive and dependable workforce. Here are testimonials from a few local employers:

*“In 1930, our grandfather Benjamin Cohen opened a small dental depot in Downtown Wilkes-Barre. Since then, Benco Dental has become the nation’s largest independent dental distributor with operations in 35 states. Key to our growth has been the excellent and dedicated team of Benco associates who deliver success, smile after smile, to thousands of dental customers every day. When we outgrew our previous facility, the quality and loyalty of our people made it an easy decision to stay and invest right here in Northeastern PA.”*

**CHARLES COHEN & RICHARD COHEN ,  
PRESIDENT & SENIOR VICE PRESIDENT,  
BENCO DENTAL SUPPLY CO., INC**

*“We have virtually no absenteeism because our employees are so committed to making life better for our patients. All of them understand that when you get into healthcare, you have to put patients first – it just comes with the territory. Their commitment is amazing.”*

**HARMAR D. BRERETON, M.D.,  
NORTHEAST RADIATION ONCOLOGY CENTERS**

*“Since relocating our US based call center to Wilkes-Barre in November of 2007, C3i has had the opportunity to recruit and train more than 175 technical people to support our pharmaceutical clients. The workforce in NEPA is very strong, and we are continually able to obtain excellent people who are qualified, professional, and dedicated to quality. Our customer satisfaction scores, which are a direct evaluation of our call center personnel, average 96%.”*

**ROBERT JONES, CFO, C3I**

*“I can honestly say that coming back to Pennsylvania and managing a facility where the employees care about their job, have a strong feeling of ownership of their company, and the motivation level to exceed is exciting and beneficial to our facility and company. I have not encountered this work ethic in many of the locations I have managed and lived in. Northeast PA is a company’s best found option for exceeding their expectations.”*

**BILL WELLIVER, FACILITY MANAGER, TELERX**

*“We have a tremendous group of dedicated, hardworking people who helped us pull together a triumphant year. We have a very, very productive team. We moved to Northeastern Pennsylvania from Yorktown Heights, which is about 45 minutes north of Manhattan, and we’ve found this to be a very cost effective area to find intelligent, skilled people.”*

**JESSICA CHESMAN, PRESIDENT, IGOURMET.COM**

*“We have a great workforce. We have capable people who are passionate about achieving their goals. We are in a low-cost area yet we have people with the skills you might think you would find only in a high-cost area. Everything in Northeast PA is just right. It’s the Goldilocks theory of doing business.”*

**SCOTT MEUSER , CHAIRMAN & CEO,  
PRIDE MOBILITY PRODUCTS CORPORATION**

*“The workforce here is very strong. The work ethic is fantastic. We feel a lot of our success as a company is due to the fact that our associates have a genuine concern about doing a great job for our customers. That’s what makes us successful in Northeastern Pennsylvania.”*

**DICK KANE, PRESIDENT, KANE IS ABLE**

*“Even though we own and operate 73 retail stores from Pennsylvania to New Jersey and upstate New York...I can tell you that the very best people we have working for us can be found right here in Northeast PA.”*

**DAVID HAWK, CHAIRMAN, GERTRUDE HAWK CHOCOLATES**

*“Our work force at the Entenmann’s Pittston DC confirms that the NEPA strong work ethic is indeed a fact and not a myth. Our employees treat the business as if they own it and pay close attention to detail to ensure that the job is done right. In addition, there is a strong sense of community within the work force that further reinforces the decision that our company made to locate their first-ever cake distribution center in this area.”*

**GEORGE J. MANTEL, JR., DISTRIBUTION MANAGER,  
BIMBO BAKERIES USA**

# EDUCATION

## HIGHER EDUCATION

NEPA is home to 17 college campuses including **The Commonwealth Medical College (TCMC, [tcmc.edu](http://tcmc.edu))**, one of the nation's newest fully-accredited medical colleges. Most of these schools offer degrees and/or certificate programs that serve the healthcare industry

TCMC offers a community-based model of medical education with regional campuses in Scranton, Wilkes-Barre, and Williamsport. TCMC attracts students who are interested in studying evidence and community-based medicine and who have a strong desire to serve their community. TCMC offers a Doctor of Medicine (MD) Program and a Master of Biomedical Sciences (MBS) Program.

Altogether, NEPA's 17 colleges have approximately 55,000 enrolled students. These schools often help to coordinate and customize training programs for area employers. Several of the schools offer degree and certificate programs that may be of interest to companies with ties to the healthcare sector. **NEPA colleges and some of their key programs include:**

**17**  
**COLLEGE CAMPUSES**

**Johnson College ([johnson.edu](http://johnson.edu))** is a private, two-year college located in Scranton with a multitude of programs that benefit employers that serve the healthcare industry. These programs include Physical Therapy Assistant, Radiologic Technology, Biomedical Equipment Technology, Computer Information Technology, Advanced Manufacturing Engineering Technology, Diesel Truck Technology, Distribution and Supply Logistics Technology, Logistics and Supply Chain Management, and Diesel Preventative Maintenance Technology.

**Luzerne County Community College ([luzerne.edu](http://luzerne.edu))** has programs and courses throughout NEPA, with its main campus located in Nanticoke in Luzerne County. Students can further their healthcare-related education with programs such as Dental Practice Management, Dental Hygiene, Dental Assisting, Emergency Medical Services, Respiratory Therapy, Surgical Technology, Nursing, Health Information Management, Office Information Technology, Warehouse Management Distribution, Building Maintenance Technology, Automated Manufacturing Systems Technology, and Industrial Maintenance.

**Misericordia University ([misericordia.edu](http://misericordia.edu))** in Dallas, Luzerne County offers highly regarded programs in its College of Health Sciences. These studies include a Doctor of Physical Therapy program, a CCNE Accredited Nursing program, Medical Imaging, Diagnostic Medical Sonography, Occupational Therapy, and Speech-Language Pathology. Misericordia also offers programs in Biology, Chemistry & Biochemistry, Medical Science, Physician Assistant, Health Care Informatics, and Health Care Management.

**Marywood University (marywood.edu)** in Scranton has many programs that may be suitable for those looking to pursue a career in the healthcare field. Marywood’s College of Health & Human Services offers Bachelor’s to Master’s degrees in Health Services Administration and Physician Assistant, as well as Graduate programs in Sports Nutrition & Exercise Science and Gerontology. The College of Liberal Arts & Sciences offers a Bachelor’s to Master’s degree program in Biotechnology, as well as many other healthcare related programs such as Medical Laboratory Science and Biology.

**King’s College (kings.edu)**, in the heart of Wilkes-Barre, offers graduate majors in many healthcare related fields. This includes a Master of Science program in Health Care Administration and a Master of Science program in Physician Assistant Studies. King’s also offers Bachelor of Science degrees in Clinical Lab Science/Medical Technology, Neuroscience, Physician Assistant, Biology, and Chemistry.

**Bloomsburg University (bloomu.edu)** in nearby Columbia County offers several healthcare programs including Biological and Allied Health Sciences, Chemistry and Biochemistry, Exercise Science, Health Physics, Medical Imaging, Pre-Medical Sciences, and Nursing.

**East Stroudsburg University (esu.edu)** in Monroe County offers healthcare related programs in its College of Health Sciences that include Athletic Training, Biology, Clinical Exercise Physiology, Exercise Science, Health Education, Public Health, Biotechnology, Medical Technology, Chemistry, a Pharmacy Transfer Program, and Nursing.

**The Pennsylvania State University (psu.edu)**, with three branch campuses in NEPA, offers a vast array of healthcare-related programs with ties to the Penn State Milton S. Hershey Medical Center. Some of these programs include Bio-Behavioral Health, Communication Sciences and Disorders, Health Policy & Administration, Human Development & Family Studies, Kinesiology, Nutritional Sciences, Nursing, Biochemistry & Molecular Biology, Biology, Biotechnology, Pre-Medical, Pre-Medicine, and Supply Chain and Information Systems, among others.

**The University of Scranton (scranton.edu)**, which is highly recognized by the Princeton Review, U.S. News & World Report, and Newsweek, offers many programs that benefit the healthcare industry. Some of the University of Scranton’s graduate programs include Chemistry, Health Administration, Nursing, and Physical Therapy, including an entry-level Doctorate of Physical Therapy program. Students can also enter Scranton’s Pre-Medical and Pre-Health Professions programs, which are taught at the University’s new Loyola Science Center.

**Keystone College (keystone.edu)** in La Plume, just north of Scranton, offers Bachelor’s and Associate’s Degrees in programs including Public Health, Biology – General, Pre-Chiropractic, Pre-Medical, Pre-Physical Therapy, Pre Physician Assistant, Allied Health – Medical Technology, Nursing/Cytotechnology, Occupational Therapy/Respiratory Care, and Radiotherapy/Medical Imaging/Cardiac Perfusion.

**Lackawanna College (lackawanna.edu)** has several campuses in NEPA and a main campus in Downtown Scranton. Lackawanna offers degrees through its Allied Health program that include Cardiac Sonography, Diagnostic Medial Sonography, Emergency Medical Services, Physical Therapy Assistant, Pre-Allied Health, Surgical Technology, and Vascular Sonography.

**Wilkes University’s Nesbitt School of Pharmacy (wilkes.edu)** offers a highly competitive guaranteed-seat pre-pharmacy program to students entering as freshmen. Upon successful completion of the two-year pre-pharmacy requirements, students are admitted to the doctor of pharmacy degree program. The doctor of pharmacy is the primary entry-level pharmacy practice degree in the United States. The school also offers the Bachelor of Science in pharmaceutical sciences degree.

In addition to the higher education institutions that serve the region, several local businesses and technical schools provide training programs that benefit area employers. These include:

#### **FORTIS (fortis.edu)**

A leading post-secondary network of institutions, FORTIS offers career-based training, diploma, and degree-granting programs at more than 40 different schools in 15 states. The two Fortis campuses located in Forty Fort and Scranton in NEPA, offer programs in healthcare, business, technology, and many other disciplines.

#### **McCann School of Business & Technology (mccann.edu)**

McCann offers a long history of post-secondary education. With NEPA locations in Wilkes-Barre, Dickson City, and Hazleton, McCann provides its students more than 35 different program options across eight unique industries. These include technology, medical, and other skilled trades such as electrical systems and HVAC technologies. McCann also has a CDL Class A tractor-trailer program at its Wilkes-Barre campus.

#### **New Horizons Computer Learning Centers (nhnepa.com)**

New Horizons Computer Learning Centers has convenient locations in CenterPoint Commerce & Trade Park in Luzerne County and in Scranton. New Horizons offers a wide range of technical, application, and business skills courses with several programs geared toward people employed in healthcare.

#### **ITT Technical Institute (itt-tech.edu)**

With more than 140 locations in 38 states, including Dunmore, Lackawanna County, ITT Technical Institute is a leading private college institution with a focus on technology-oriented programs. ITT's schools of study in Dunmore include the School of Information Technology, the School of Drafting and Design, and the School of Electronics Technology.

## TRAINING PROGRAMS

**Pennsylvania's Workforce Investment Boards (WIBs)** help employers recruit and screen potential employees at no cost to the employers. WIBs are non-profit boards of business people and community leaders engaged in the promotion of workforce development, planning, and oversight of local training efforts under the auspices of the Federal Workforce Investment Act (WIA). Four WIBs serve NEPA.

There are several grant programs available to help companies reduce their training costs.

#### **Guaranteed Free Training Program**

The Guaranteed Free Training Program provides basic skills and Information Technology training for eligible employees of expanding businesses. The program can be used towards basic and entry-level skills training and Information Technology-Advanced Information Technology training. The program is available to Pennsylvania manufacturing and technology-based businesses.

Trainees must be Pennsylvania residents, employed in Pennsylvania, permanent full-time employees, and earn at least 150% of the current federal minimum wage. The program's basic skills training provides up to \$450 per trainee and \$75,000 per company. The information technology training provides up to \$850 per trainee and \$50,000 per company.

#### **Work Force Investment Act of 1998**

The Work Force Investment Act of 1998 is a federal program that reimburses employees for part of the cost of training. Eligible candidates for this program include private and public sector employers and employees. Any employer that trains program-eligible applicants can apply for reimbursement through the WIA program.

Eligible applicants include dislocated workers and unemployed persons. The funds can be used for job search and placement, skills assessment and evaluation, counseling, and training services for individuals and companies, supportive services, and labor market information. Companies can receive reimbursement for up to 50% of wages paid to eligible employees during training and up to actual costs of classroom training and related training support services. Reimbursement varies by local workforce WIB area.

Please visit [www.newpa.com](http://www.newpa.com) for more information on these training programs.

## REAL ESTATE

### REAL ESTATE COSTS

Average industrial lease rates in NEPA are significantly lower than those in most major northeast metro areas. A study by national business consultant Wadley Donovan Growth Tech compared lease rates for several areas in NEPA with rates in Middletown, New York and Hightstown, New Jersey. On average, lease rates in NEPA are 79% of those in Middletown and just 69% of those in Hightstown. Likewise, in several Industrial Market Reports released in 2014, prominent national real estate firm Cushman & Wakefield listed average lease rates for industrial space in NEPA that were 74% of those in Central New Jersey and 59% of those in Northern New Jersey.

### MERICLE COMMERCIAL REAL ESTATE SERVICES

Mericle Commercial Real Estate Services is NEPA's leading developer of investment-grade industrial, office, flex, and medical space. Mericle has provided commercial real estate solutions to a variety of healthcare and healthcare-related companies. These include Apria Healthcare, Aramark, Arjo Huntleigh, Benco Dental, Brace Place, Cintas First Aid and Safety, C3i, Commonwealth Health, Corning Life Sciences, CVS Caremark, GE Healthcare, Geisinger Health Network, Henry Schein, KCI, Maximus, Musculoskeletal Transplant Foundation, NBTY, Inc., Patterson Dental Supply, Inc., PharMerica, Unifirst Corporation, Telerx, and Young's Medical Equipment.

In the late 1980s, Mericle became the first for-profit private developer to construct industrial shell buildings on speculation in NEPA. Mericle purchased land that had been developed by area chambers of commerce and constructed speculative buildings ranging from 40,000 square feet to 100,000 square feet. Since that time, Mericle has developed more than 19 million square feet of industrial, office, flex, and medical space in NEPA. More than 13,400 people work in Mericle-developed properties.

Today, Mericle owns and maintains approximately 11 million square feet in NEPA. Mericle is a vertically integrated "master builder" that self-performs its development projects. The company's approximately 200 employees design, construct, and maintain all of its facilities. Mericle's in-house property management division maintains the company's entire portfolio and is on call 24-7. This unique business platform eliminates multiple profit centers and saves Mericle's tenants and clients time and money.

Among Mericle's in-house team are two Leadership Energy & Environmental Design (LEED) Accredited Professionals who obtained Silver LEED status for Mericle buildings occupied by Amazon.com, Kimberly Clark, and Benco Dental.

Several years ago, Mericle started a Green Building Program and made a commitment to provide lower operating costs to tenants through the implementation of eco-friendly, energy saving measures.

By constructing tight building envelopes, installing energy-efficient T-bay lighting and HVAC systems, improving ventilation and indoor air quality, and by using native and adaptive landscaping and recycled/regional materials, Mericle is making a concerted effort to “go green.”

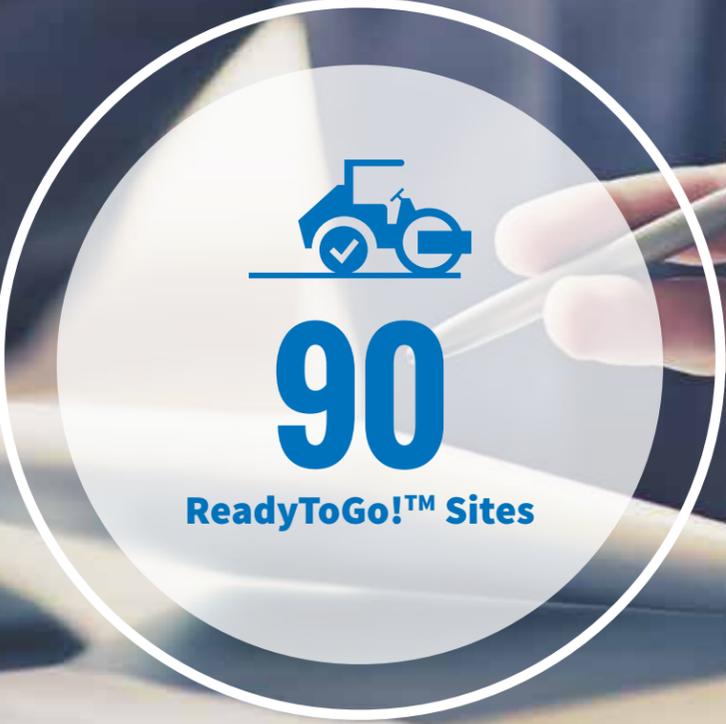

In addition to regularly constructing buildings on speculation, Mericle also prepares sites in advance for new construction.

In fact, through its ReadyToGo!™ Program, Mericle is developing more than 90 such sites in 11 NEPA business parks.

Mericle’s design department obtains all necessary permits and approvals, and its excavation division, considered to be one of the largest of its kind in the US, clears, grades, and compacts the ReadyToGo!™ Sites and makes them ready for the immediate construction of building foundations. These sites also have all permits and approvals in hand, all utilities in place, and can accommodate buildings ranging from as small as 10,000 square feet to as large as 1 million square feet.

Mericle’s vertically integrated “one-stop-shop” structure and its aggressive development of speculative industrial buildings and ReadyToGo!™ Sites are very helpful to healthcare manufacturers and distributors operating under compressed timeframes wishing to deal with a single source.

All of Mericle’s available buildings and sites can be reviewed at [mericlereadytogo.com](http://mericlereadytogo.com).

**90**  
ReadyToGo!™ Sites

“*Serving Northeastern Pennsylvania, UGI Penn Natural Gas Inc. is uniquely situated in the heart of the Marcellus Shale region. Our large commercial and industrial transportation customers have access to some of the most favorably priced natural gas in the country. Further, the abundance of supply in the region is expected to provide long term price stability, making the region a prime target for growth.*”

**DON BROMINSKI, DIRECTOR OF BUSINESS DEVELOPMENT  
UGI PENN NATURAL GAS, WILKES-BARRE, PA**

## UTILITIES

The region is utility strong with natural gas, public water and sewer, abundant power, and fiber service readily available.

High pressure gas mains owned and maintained by UGI Penn Natural Gas provide service to area business parks.

The discovery of an estimated 500 trillion cubic feet of natural gas in the rock located under a 22.4 million acre area that covers much of NEPA, the Northern Tier of Pennsylvania, and Upstate New York, has had an enormous impact on the regional economy. The Marcellus Shale region has been recognized as the “largest unconventional natural gas reserve in the world.”

Thousands of acres in NEPA and the Northern Tier have been leased by natural gas companies. Billions of dollars are being invested here by Southwest US energy companies. Because of this investment in Marcellus Shale, NEPA’s natural gas prices continue to drop and employers are expected to have access to abundant and affordable natural gas for decades to come.

Water quality is good and pressures are very strong. In fact, in some business parks, companies choose to install pressure reducers to control water pressure to their buildings.

The primary water supplier in NEPA is Pennsylvania American Water Company (PAWC). Because PAWC is part of American

Water, it benefits from the company’s central laboratory in Belleville, Illinois, one of the most advanced water quality laboratories in the US.

There, the company performs tests to monitor for about 100 regulated contaminants and other “emerging contaminants” that are not currently regulated. Additionally, PAWC provides input to the US Environmental Protection Agency as new testing regulations are developed.

Since 1993, the American Water research team has won nearly two dozen awards for best research, received more than \$31 million in research grants, and been granted four patents for water and wastewater research.

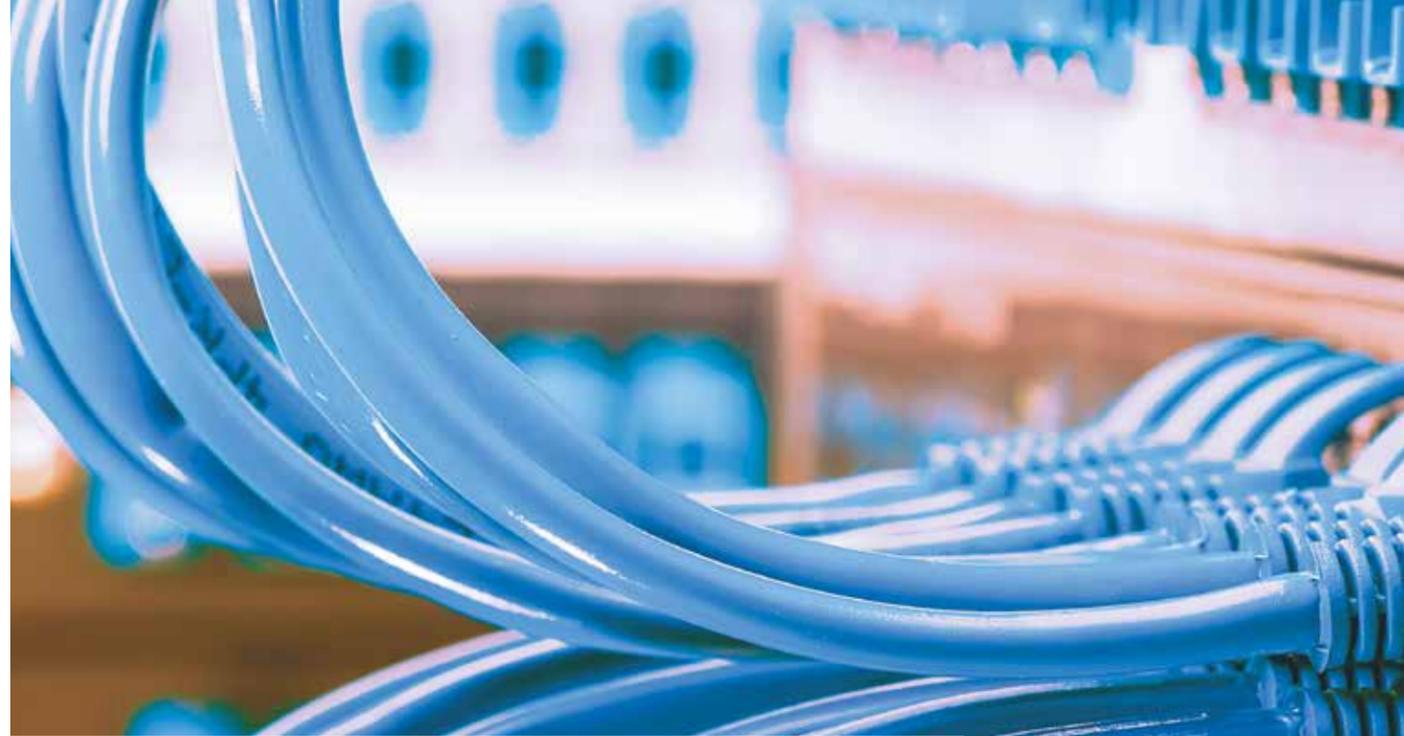

Several local sewage treatment facilities can accept large amounts of biochemical oxygen demand (BOD) and suspended solids without requiring businesses to pretreat their effluent.

Redundant power is supplied to several local industrial and office parks via PPL Electric Utilities and UGI Utilities. In most parks, 4000 amp service is offered.

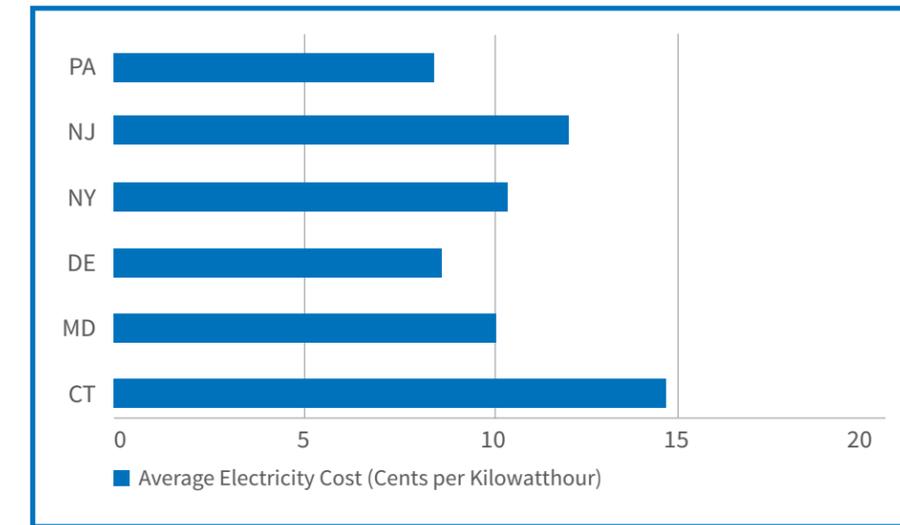

Multiple telecom vendors, including Verizon, Frontier Communications, Level 3, and Comcast serve the area and provide fiber, copper, and cable service to local business parks.

Comcast Business has made one of its most significant infrastructure investments to bring its national, private fiber-optic network to every existing building at CenterPoint Commerce & Trade Park near Pittston and to those parcels that are construction-ready under Mericle's ReadyToGo!™ Program. That means companies can access secure, scalable, high-performance dedicated internet and point-to-point and multipoint connectivity – optimized for businesses with multiple locations – within 30 days of order.

Comcast Business enterprise solutions deliver symmetrical bandwidth that scale from 50 Mbps up to 10 Gbps, enabling businesses of all sizes to choose from a comprehensive portfolio of services (data, voice, and video) as well as Ethernet services – all of which feature proactive network and service monitoring 24x7x365 from Comcast's dedicated Network Operations Centers. In addition, Comcast can also provide back-up and disaster recovery services for redundancy needs and has a local support team located just minutes from Centerpoint.

AVERAGE ELECTRICITY COST FOR PA & SURROUNDING STATES

### FOREIGN TRADE ZONES

There are more than 2,000 acres of Foreign Trade Zone (FTZ) land located in six NEPA business parks. These lands are part of FTZ #24 under the auspices of the Eastern Distribution Center. Much of Mericle's CenterPoint Commerce & Trade Park near Pittston, PA is in an FTZ. Mericle also owns properties in the Jessup Small Business Center and Valley View Business Park near Scranton, which have FTZ status.

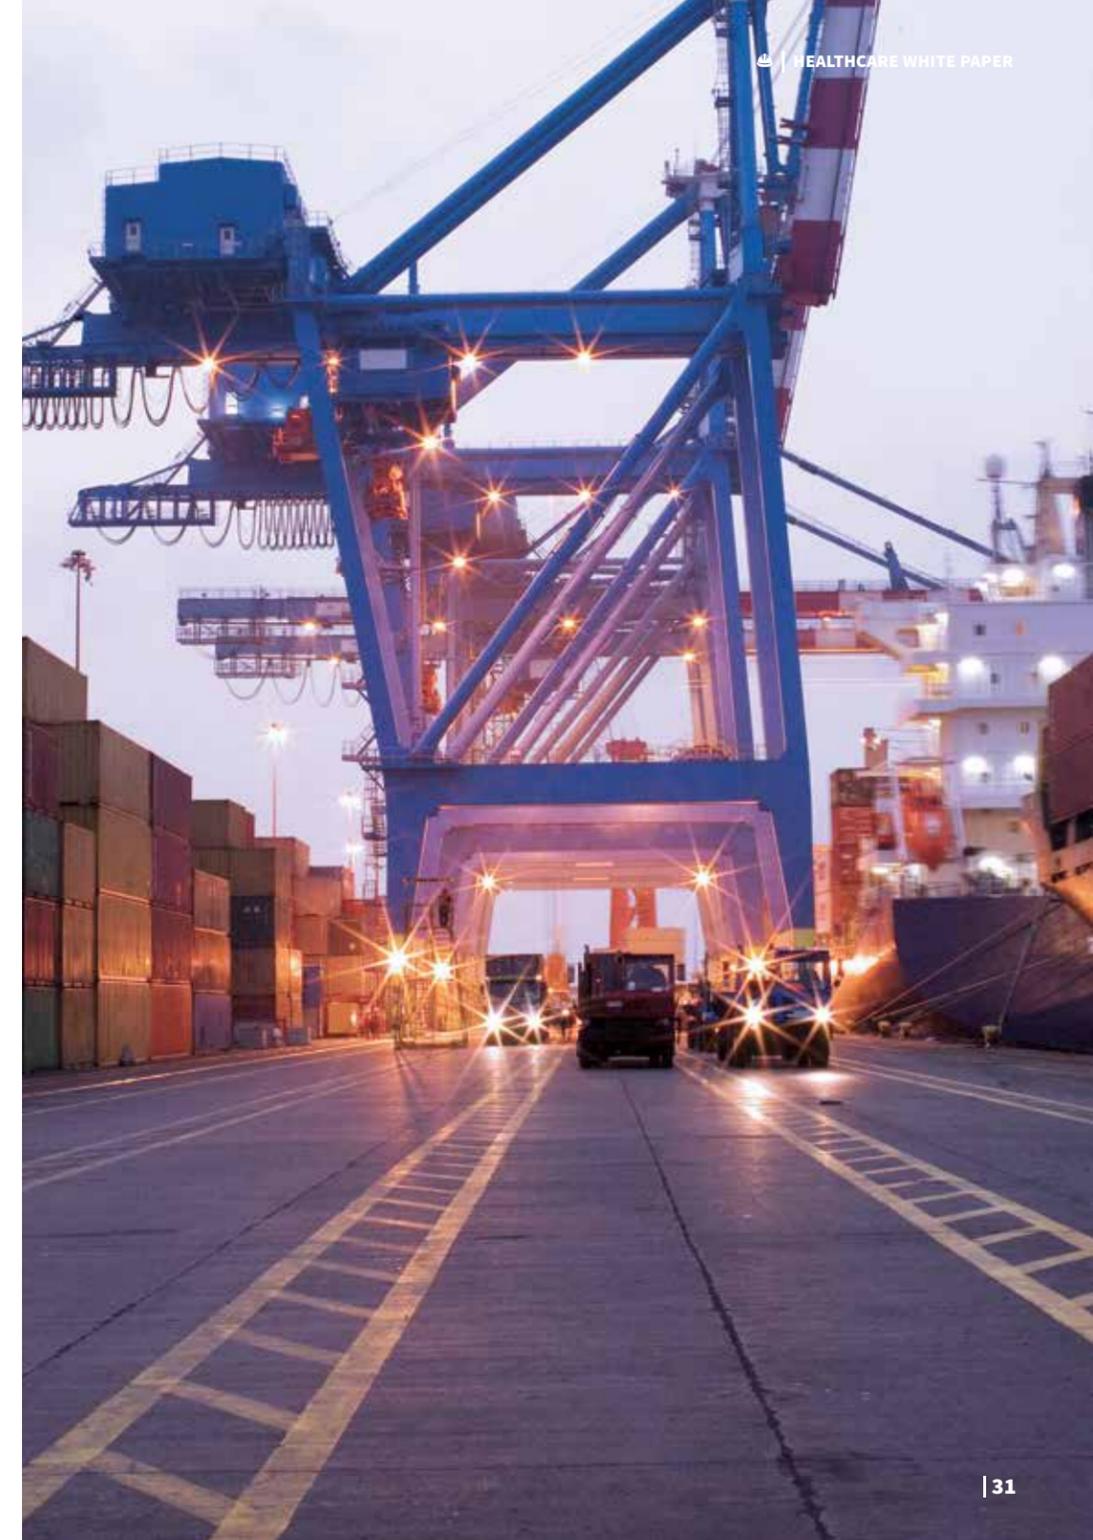

FTZs encourage and expedite import/export cargo movements. These specially designated zones are considered outside the Customs territory of the US, which means that merchandise can be stored, exhibited, assembled, manufactured, and processed without being subject to formal Customs entry procedures and payment of duties - unless and until the merchandise enters the Customs territory for domestic consumption. FTZs offer a variety of benefits including duty deferral, relief from inverted tariffs, duty elimination on waste and scrap, duty exemption on re-exports, and no duties on domestic content, added value, and rejected or defective parts.

### THIRD PARTY LOGISTICS

In addition to the dozens of truckload and less than truckload companies with operations in NEPA, there are also numerous national and local third party logistics (3PL) companies here. Some of the most active 3PLs in NEPA include Kane is Able, Romark Logistics, Genco ATC, XPOLogistics, Penske Logistics, J.B. Hunt, and LeSaint Logistics. Mericle has provided space to most of these companies.

### COLD CHAIN SPACE

Some of the nation's largest cold storage companies have major industrial facilities in NEPA. For example, Henningsen Cold Storage Company, United States Cold Storage, Inc., Americold, and RLS Logistics, together operate about 1 million square feet of cold chain space here. In addition, PRIME Inc., one of North America's largest refrigerated trucking companies, has a large terminal in NEPA.

# INCENTIVES

A variety of grant, tax credit, tax abatement, and low interest loan programs exist to help NEPA employers reduce their operating costs. Some of the programs commonly used by manufacturers and distributors of healthcare products follow. More information about many of these programs can be found at [newpa.com](http://newpa.com).

## LOCAL ECONOMIC REVITALIZATION TAX ASSISTANCE (LERTA)

Mericle's CenterPoint Commerce & Trade Park offers industrial sites and buildings located in a Local Economic Revitalization Tax Assistance (LERTA) Zone. In CenterPoint, all of the local taxing bodies – the county, the municipality, and the school district – have approved the zone status.

Real estate taxes on improvements are abated 100% for 10 years for buildings constructed in the park. Please contact Mericle at [570.823.1100](tel:717-823-1100) for estimates of specific cost savings that will be realized via LERTA.

## JOB CREATION TAX CREDIT PROGRAM

The Job Creation Tax Credit Program (JCTC) offers a \$1,000 state tax credit per new full-time job per year to employers who demonstrate effective development or deployment of leading technologies in business operations. Businesses must create at least 25 new full-time jobs or expand their existing workforce by at least 20 percent within three years of approval. Tax credits will not be applied until the workforce increase requirement has been met.

In order to count as a full-time employee under the JCTC program, new employees must earn an average of 150% of the federal minimum wage, excluding benefits. The credit may be utilized to pay a number of state business taxes. At least 25% of all available tax credits will be awarded every year to businesses that employ 100 or fewer employees.

An eligible business must agree to maintain its operation in Pennsylvania for a minimum period of five years from the start date of approval. Please visit [newpa.com](http://newpa.com) for specific requirements and restrictions.

## KEYSTONE OPPORTUNITY ZONE

A Keystone Opportunity Zone (KOZ) is a property where the majority of an eligible company's state and local taxes are abated until the end date of the zone. In order for the Commonwealth of Pennsylvania to have designated a property as a KOZ, the county, municipality, and school district where the property is located must have agreed to abate their share of local taxes.

Some of the taxes that are abated are local real property taxes, Pennsylvania's Corporate Net Income Tax, Pennsylvania's Capital Stock & Foreign Franchise Tax, and Pennsylvania's Sales and Use Tax on certain items.

Mericle Commercial Real Estate Services has developed more space in Pennsylvania KOZs than any other developer. Mericle owns several available properties with KOZ status.

## PENNSYLVANIA FIRST PROGRAM

The Pennsylvania First Program helps businesses that create or retain a significant number of jobs and make a substantial investment within the state. These businesses can receive support in the form of grants, low interest loans, and loan guarantees for job training, property acquisition, site preparation, land and building improvements, purchasing or upgrading machinery and equipment, infrastructure, environmental assessments, job training, and working capital.

The program requires participants to commit to operating at the approved project site for a minimum of seven years. Businesses aided by Pennsylvania First must create or retain at least 100 full-time positions or increase their full-time employment by 20% within the Commonwealth. Full-time employees must earn at least 150% of the federal minimum wage. Other requirements include offering a substantial economic impact for the region and, at the least, matching the Pennsylvania First assistance requested with private investment.

Loan terms can be up to 15 years for real estate and infrastructure and up to 10 years for machinery and equipment. Interest rates will be set at the time of approval and will be based on the 10-year Treasury rate. Those interested in applying can complete the Single Application for Assistance online at [newpa.com](http://newpa.com).

**DOZENS OF NEPA'S COMPANIES OPERATE HEALTHCARE MANUFACTURING AND/OR DISTRIBUTION FACILITIES. HERE ARE BRIEF DESCRIPTIONS OF A HANDFUL OF THOSE COMPANIES.**

**SANOFI PASTEUR**

DISCOVERY DRIVE  
SWIFTWATER, PA 18370

Sanofi Pasteur, the vaccines division of Sanofi, has its US headquarters in Swiftwater, Pennsylvania, just northwest of Stroudsburg where more than 2,000 people are employed. On this site are the only two currently licensed US facilities that manufacture influenza vaccine.

Sanofi Pasteur provides more than 1 billion doses of vaccine each year, making it possible to immunize more than 500 million people across the globe. A world leader in the vaccine industry, Sanofi Pasteur offers a broad range of vaccines protecting against 20 infectious diseases. The company's heritage, to create vaccines that protect life, dates back more than a century. Sanofi Pasteur is the largest company entirely dedicated to vaccines.

**CVS CAREMARK**

1 GREAT VALLEY BOULEVARD  
HANOVER CROSSINGS  
HANOVER TOWNSHIP, PA

CVS Caremark, a Fortune 500 company and the largest pharmacy healthcare provider in the United States, distributes prescriptions from a 160,000 square foot mail service pharmacy in Hanover Crossings near Wilkes-Barre. CVS has opened mail service pharmacies in strategic locations throughout the US to make healthcare easier and more affordable.

The facility, which opened in October 2000, was started as a Mericle speculative project, then redesigned and constructed by Mericle to the exact specifications of mail service pharmacy Advance Paradigm. Through a series of corporate acquisitions, CVS Caremark acquired Advance Paradigm and became the occupant of the building. In September 2008, CVS Caremark announced it would expand its workforce at the site from 450 to 600 employees. In 2011, the company announced it would create an additional 200 jobs at this location.

**BENCO DENTAL**

295 CENTERPOINT BOULEVARD  
CENTERPOINT COMMERCE &  
TRADE PARK EAST  
JENKINS TOWNSHIP, PA

Founded in 1930 by Benjamin Cohen, Benco Dental chose a Mericle building in CenterPoint Commerce & Trade Park East, Jenkins Township for its corporate headquarters and main distribution center. Benco is the largest privately-owned distributor of dental supplies and equipment in the United States. The company provides a full-service experience for its customers, including services such as office design, clinical education and practice training, dental-specific technology solutions, and many other dental related services.

With more than 50 regional showrooms and five distribution centers serving tens of thousands of dental professionals in all 50 states, Benco Dental is the nation's fastest growing dental distributor. Its 272,800 square foot CenterPoint headquarters serves as both a showroom and a distribution center for the Northeast and much of the Mid-Atlantic regions. With this strategic location, Benco Dental is able to make good on its motto, "We deliver success smile after smile," to more than 83 million possible smiles.

**NBTY, INC.**

10 SIMMONS DRIVE  
HUMBOLDT INDUSTRIAL PARK  
HAZLE TOWNSHIP, PA

Founded in 1971, NBTY Inc., is the nation's largest nutritional supplement manufacturer and distributor. NBTY is known for recognizable brands such as MET-Rx, Vitamin World, Body Fortress, and many others. Under its Nature's Bounty brand, NBTY distributes nutritional vitamins and supplements from a company-owned distribution center in the Humboldt Industrial Park in Hazleton, Pennsylvania.

Mericle developed the 413,600 square foot NBTY building in Humboldt. The location provides the company with very quick access to I-81 and I-80. NBTY President and CFO Harvey Kamil said, "Humboldt Industrial Park was a perfect fit for our company because of its proximity to major markets, accessibility to a qualified available workforce, and the tax credits offered by the Keystone Opportunity Zone program."

**PHARMERICA**

153 STEWART ROAD  
HANOVER INDUSTRIAL ESTATES  
HANOVER TOWNSHIP, PA

Pharmerica Corporation operates an institutional pharmacy in a Mericle flex building in Hanover Industrial Estates near Wilkes-Barre.

PharMerica services healthcare facilities in the United States, provides pharmacy management services to hospitals, specialty infusion services to patients outside a hospital setting, and offers the only national oncology pharmacy and care management platform in the United States. PharMerica operates 98 institutional pharmacies, 15 specialty infusion centers, and 5 specialty oncology pharmacies in 45 states. PharMerica's customers are institutional healthcare providers, such as skilled nursing facilities, nursing centers, assisted living facilities, hospitals, individuals receiving in-home care, and other long-term alternative care providers.

**PRIDE MOBILITY PRODUCTS**

182 SUSQUEHANNA AVENUE  
EXETER, PA

Pride Mobility Products® Corporation, headquartered in Luzerne County, is the world's leading designer and manufacturer of mobility products including Jazzy® Power Chairs, Pride® Mobility Scooters, Pride® Lift Chairs, and Pride® Lifts and Ramps.

Pride Mobility Products employs 1,100 people worldwide. It operates distribution centers in Tampa, FL; Las Vegas, NV; and Mesquite, TX. The company also has operations in Australia, Canada, Italy, the Netherlands, New Zealand, and the United Kingdom.

**GOLDEN TECHNOLOGIES**

401 BRIDGE STREET  
OLD FORGE, PA

Golden Technologies is proud to be a true American manufacturer of lift chairs. The company's headquarters in Old Forge, Lackawanna County is the largest facility in the world dedicated solely to the manufacture of lift chairs. The company's other product lines –mobility scooters and power wheelchairs — are assembled and distributed in a “mobility operations” facility in nearby Kingston, Luzerne County. Golden Technologies was founded in 1985 in a garage in West Pittston, Luzerne County and over the decades has grown into one of the world's leading manufacturers of power lift and recline chairs sold throughout the US, Canada, and Europe. The company employs more than 400.

**NOBLE BIOMATERIALS, INC.**

300 PALM STREET  
SCRANTON, PA

Headquartered in Scranton, PA, Noble Biomaterials, Inc. is a global leader in bacterial management solutions. The company develops, manufactures, sells, and markets advanced antimicrobial technologies designed to manage all forms of bacterial contamination. It has more than 200 global licensees for products in the medical, defense, industrial, and consumer markets.

The company's manufacturing facility is also located in Scranton with global offices in Europe, Asia and South America.

The company is especially known for its X-Static® line of products. X-STATIC® is the leader in antimicrobial fabric technology and is clinically-proven to reduce bacterial contamination on soft surfaces. X-STATIC® is the most effective and safest soft surface antimicrobial solution available today.

**MUSCULOSKELETAL TRANSPLANT FOUNDATION**

1232 MID VALLEY DRIVE  
MID VALLEY INDUSTRIAL PARK  
JESSUP, PA

The Musculoskeletal Transplant Foundation (MTF), the nation's leading tissue bank, connects donors with surgeons and transplant recipients. Headquartered in Edison, New Jersey, MTF occupies a flex building developed by Mericle in Jessup, Lackawanna County.

A non-profit organization, MTF prides itself on its resilient and safe allograft tissue. This tissue is a bone, ligament, cartilage, tendon, or skin section that is grafted between a donor and its recipient, such as athletes in need of knee reconstruction. MTF is continuing to advance the tissue transplant industry through its engagement in research and development. Since its inception in 1987, MTF has recovered tissue from more than 90,000 donors and distributed more than 5 million grafts for transplantation.

**MERICLE**  
COMMERCIAL REAL ESTATE SERVICES

570.823.1100 [MERICLE.COM](http://MERICLE.COM)      
100 BALTIMORE DRIVE, WILKES-BARRE, PA
